how to make a paper pirate hat out of newspaper

Published: September 3, 2026 | Index ID: #-

Introduction

Imagine the salty wind whipping across the deck of a wooden ship, the creak of the hull, and the daring call of a pirate crew. A pirate hat is the unmistakable symbol of adventure, daring, and a touch of mischief. While a high quality costume hat can be pricey, a paper pirate hat made from everyday newspaper is a fun, eco friendly alternative that sparks creativity and brings the spirit of the high seas to life. Whether you're crafting for a themed party, a school project, or just a playful afternoon, this guide will walk you through every step of turning ordinary newsprint into a stylish, authentic pirate headpiece.

Materials Needed for a Newspaper Pirate Hat

Before you start, gather the following supplies. They're inexpensive, widely available, and easy to work with.

- Several sheets of newspaper (preferably the largest, un inked side)
- Scissors or a paper cutter
- Hot glue gun or strong adhesive tape (double sided tape works well too)
- Cardboard or foam board (optional, for extra support)
- Paint, markers, or colored pencils for decoration
- Feather, fabric, or a small flag for embellishment
- Measuring tape or ruler
- Optional: a small piece of fabric for a lining

Step by Step Guide to Making a Paper Pirate Hat

Step 1: Gather and Prepare Your Newspaper

Choose the largest sheets available. The bigger the sheet, the easier it is to fold and shape. Remove any torn or heavily inked sections that might tear during construction. If you prefer a cleaner look, you can also use the white side of the newspaper, which will be easier to paint or color later.

Step 2: Create the Hat Base

Start by cutting a rectangle that measures about 12 inches wide and 8 inches tall. This will serve as the main body of the hat. If you're making the hat for a child, you may need to adjust the size accordingly.

Fold the rectangle in half lengthwise, then unfold to create a central crease. This crease will help maintain the hat's shape during assembly.

Step 3: Shape the Crown

Using the central crease as a guide, fold the top corners of the rectangle toward the center, forming a triangle shape that will become the crown. The point of the triangle should sit at the top of the hat, just above the brim.

Apply a thin layer of hot glue or tape along the edges where the folds meet. Press firmly and let the adhesive set. This will lock the crown in place and give it a sturdy structure.

Step 4: Add the Brim

The brim is what makes a hat recognizable as a pirate hat. Measure around the base of the crown to determine the width of the brim. A typical pirate hat brim is about 3 to 4 inches wide.

Cut a strip of newspaper that is 3–4 inches wide and long enough to wrap around the crown. Wrap the strip around the crown, aligning the edges. Secure with glue or tape, ensuring the brim sits evenly on all sides.

Step 5: Reinforce with Tape or Glue

For extra durability, especially if the hat will be worn for an extended period, reinforce the entire structure. Apply a thin layer of glue or double sided tape along the outer edges of the crown and brim. If you're using cardboard or foam board, place a small piece beneath the crown's base before gluing to add stiffness.

Step 6: Personalize Your Hat

Now that the hat's basic shape is complete, it's time to bring it to life.

- Paint or Color: Use acrylic paint, markers, or colored pencils to give the hat a weathered, aged look. Dark browns, grays, and muted greens evoke the feel of a well trodden pirate's headgear.
- Add a Jolly Roger: Cut a small black or white rectangle and paste it onto the front of the crown. You can also draw a skull and crossbones directly onto the paper.
- Attach a Feather: Glue a small feather or a piece of faux fur to the brim for an extra touch of flair.
- Fabric Lining: If the hat feels too rough, line the interior with a soft fabric or a piece of felt. This also adds comfort for the wearer.

Tips for a Durable and Comfortable Pirate Hat

Use Quality Newspaper

Not all newspapers are created equal. Opt for sheets that are thick enough to hold their shape but still pliable. If you're reusing old newspapers, make sure they're free from staples, tape, or other debris that could tear.

Reinforce with Cardboard or Foam

Inserting a small cardboard or foam piece under the crown can dramatically increase the hat's resilience. Cut a circle or oval that fits snugly beneath the crown's base, then glue it in place. This hidden support keeps the hat from collapsing over time.

Test Fit Before Finalizing

Before you apply any permanent adhesive, place the hat on the wearer's head to ensure a proper fit. Adjust the brim's width or the crown's height if needed. This step saves you from having to re work the entire hat after it's already glued.

Keep the Hat Dry

Paper is vulnerable to moisture. If the hat will be worn in damp conditions or after a rainy adventure, consider applying a light coat of clear spray sealant. This protects the paper from water damage while preserving its texture.

Variations and Creative Ideas

Pirate Hat with a Skull and Crossbones

For a classic look, print or draw a skull and crossbones onto a small piece of paper. Attach it to the front of the crown using glue or tape. This instantly signals to onlookers that you're a bona fide pirate.

Colorful Newspaper Pirate Hat

Instead of painting the hat, use colored newspaper sheets to create a vibrant, patchwork design. Layer different colored newsprint, cut out shapes, and glue them onto the hat's surface. The result is a unique, eye catching hat that stands out from the crowd.

Adding a Feather or Jolly Roger Flag

Attach a small feather to the brim or hang a miniature Jolly Roger flag from the crown. These embellishments add authenticity and flair, turning a simple paper hat into a show stopping piece.

Common Problems and How to Fix Them

Hat Flattens or Crumples

If the hat loses its shape, reinforce the crown with a thicker layer of glue or add a small cardboard insert. For a temporary fix, gently press the crown back into shape while the glue dries.

Brim Falls Off

Ensure the brim's edges are glued firmly to the crown. If the brim keeps slipping, add a strip of double sided tape along the inner edge of the brim before re applying the glue.

Paper Tears

Paper can tear easily under stress. Use a small amount of glue along the edges before folding to reduce tension. If a tear occurs, patch it with a tiny piece of newspaper and secure with a dab of glue.

Where to Use Your New Paper Pirate Hat

Parties and Costumes

Whether it's a Halloween bash, a themed birthday party, or a school dance, a newspaper pirate hat is an instant crowd pleaser. Pair it with a simple tunic, a pair of eye patches, and a plastic sword for a complete look.

School Projects

Teachers can use this craft as a hands on lesson in recycling, design, and cultural history. Students learn how to transform waste into art while exploring pirate lore and storytelling.

Recycled Craft Projects

Encourage kids to bring in old newspapers and turn them into pirate hats as part of a larger recycling initiative. This activity promotes environmental awareness and creative problem solving.

Conclusion

Crafting a paper pirate hat from newspaper is more than just a fun activity—it's a celebration of creativity, sustainability, and the timeless allure of pirate adventures. With a few simple materials and a handful of steps, you can transform ordinary newsprint into a headpiece that captures the imagination of kids and adults alike. Whether you're preparing for a costume event, a classroom activity, or a rainy day of play, this guide equips you with everything you need to build a durable, comfortable, and eye catching pirate hat. So gather your newspapers, roll up your sleeves, and let the adventure begin!
